

green statement

earth friendly initiative

Working with vendors who support our beliefs:

Our paper-based wallcoverings, both residential and premium commercial products are:

- Purchased from ISO 14001 certified companies
- Elemental chlorine-free pulp used free of any vinyl filling
- Created using over 45% renewable energy through hydroelectric facilities
- Printed using only water-based inks free of harmful solvents

We are proud to work with companies who support the Sustainable Forestry Initiative.

our internal commitment

SurroundDecor is committed to working to better the environment as a responsible member of the business community. We are proud to share that we recycle all printed and unprinted waste paper and cardboard supplies. Beyond our products, we recycle all ink and toner components (including print heads and ink/toner cartridges) as well as aluminum cans, paper, cardboard, and glass.
